VÍCTOR VERDÚ SAMPER

B.Sc. Biology Student | Molecular Medicine | Computational Biology

victor.versam@gmail.com +34 601 297 106 Madrid, Spain Víctor Verdú Samper

PROFILE

Final-year Biology student at Universidad Autónoma de Madrid with a strong interest in molecular medicine, translational neuroscience and computational biomedical research. Experienced in neurodegenerative disease research, particularly Amyotrophic Lateral Sclerosis (ALS), combining molecular genetics techniques with machine learning approaches for biomarker discovery and prognostic modelling. International research experience in the United Kingdom and hands-on clinical laboratory training in genetic diagnostics within a hospital environment.

EDUCATION

Bachelor's Degree in Biology

Universidad Autónoma de Madrid

2021 – Present Madrid, Spain

- Focus on genetics, molecular biology, neuroscience and translational medicine.
- Final Bachelor's Thesis focused on machine learning-based survival prediction in ALS.
- Academic training in molecular diagnostics, genomics and biomedical data analysis.

High School Diploma Health Sciences

Santa María de la Paz

2019 – 2021 Murcia, Spain

RESEARCH EXPERIENCE

Computational Neuroscience Research Intern

Heriot-Watt University

Jul 2025 – Sep 2025 Edinburgh, United Kingdom

- Participated in the Erasmus Placement Programme conducting research in computational neuroscience.
- Worked on the project: Deep Learning-based Characterisation of Protein Aggregation in ALS.
- Applied machine learning techniques for analysis of neurodegenerative disease-associated protein aggregation.
- Presented final results at the ML-Health Summer Student Event attended by researchers and students across Heriot-Watt University campuses.
- Contributed to ongoing collaborative research progressing towards a joint scientific publication with the University of Aberdeen.
- Research findings scheduled for presentation at ENCALS 2026.

Genetic Diagnostic and ALS Research Intern

Hospital Universitario 12 de Octubre

Nov 2025 – Mar 2026 Madrid, Spain

- Performed genetic diagnostic workflows for neuromuscular disorders in a clinical laboratory environment.
- Conducted PCR amplification, agarose gel electrophoresis and purification protocols for Sanger sequencing.
- Participated in preparation and processing of patient-derived genetic samples.
- Analysed and interpreted Sanger sequencing data for molecular diagnosis.
- Worked with genes associated with neuromuscular and neurodegenerative diseases.

Bachelor's Thesis Researcher

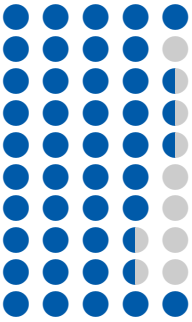
Hospital Universitario 12 de Octubre

Mar 2026 – Present | Madrid, Spain

- Developing a machine learning model for survival prediction in ALS patients using a large clinically characterised cohort.
- Integrating genomic variants and clinical variables to identify prognostic biomarkers.
- Applying statistical learning and multivariate analysis techniques for precision medicine approaches.

TECHNICAL SKILLS

Scientific Writing
Machine Learning
Statistical Analysis
Molecular Genetics
PCR Techniques
Sanger Sequencing
Python
R
Bioinformatics
LaTeX



SOFTWARE & TOOLS

Python | R | VS Code | Chromas | BioEdit | SPSS | GraphPad Prism | LaTeX | Microsoft Excel

RESEARCH INTERESTS

Molecular Medicine | Neurodegeneration | ALS | Precision Medicine | Translational Medicine | Machine Learning | Genomics | Biomarkers | Computational Biology

LANGUAGES

Spanish
Native

English
Full Professional Proficiency

Catalan / Valencian
Native Proficiency

SOFT SKILLS

- Strong adaptability to multidisciplinary and international environments.
- Excellent communication and teamwork abilities.
- Independent working capacity with high attention to detail.
- Analytical mindset and problem-solving orientation.
- Organised, proactive and research-driven.

ADDITIONAL INFORMATION

- International academic and research experience across Europe.
- Strong interest in translational biomedical research and precision medicine.
- Passionate about neuroscience, genomics and computational approaches to disease.
- Hobbies include travelling, reading and music.
